

European Solar Energy Storage

Swedish energy storage fire protection manufacturer

Overview

Can battery energy storage systems be installed in Sweden?

There are currently no national rules, advice or standards for how fire protection should be dimensioned or where battery energy storage systems can be installed in Sweden. This creates an uncertainty for those who want to install battery energy storage systems. The aim of this project is to produce national guidelines regarding fire safety of BESS.

What role does battery storage play in Sweden's energy infrastructure?

This increase underscores the growing role of battery storage systems in stabilising and supporting Sweden's energy infrastructure. Swedish Solar Energy launched version 1.1 of its fire protection guideline for stationary battery storage systems on October 29, 2024.

What industries does Firefly protect?

Firefly protects industrial processes all over the world, in sectors such as woodworking, wood panel manufacture, paper, tissue, absorbent materials, food industry, ports, power plants, biofuel manufacture and the recycling industry. The key to productivity in any continuous process is to avoid downtime.
