Epidemiology of Traumatic Spinal Cord Injury in the Netherlands

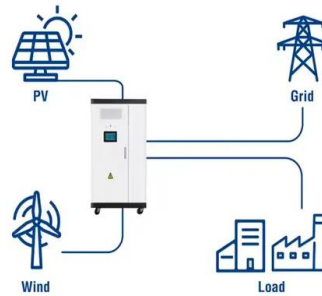

These patients are generally transported to the trauma centers by an ambulance provided by the central Dutch region's emergency medical service unit (EMS; in Dutch, Regionale Ambulancevoorziening Utrecht [RAVU]). The trauma care in the Netherlands is aided by the helicopter emergency medical service (HEMS), with specialized helicopter crews

EBST -- AimLite

The EBST series of commercial steel battery units is designed to provide efficient and reliable emergency lighting. Utilizing a sturdy, all steel housing, the EBST presents a modern and unobtrusive design. On higher capacity models, the cabinet front is sloped to allow better internal access and superior low angle light distribution. The EBST can also [...]
