Explore Togo solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights. Comprehensive data on capacity, costs, and growth.

In Togo, rural electricity projects are steered by the Rural Electrification and Renewable Energy Agency. Several companies, including BBOX, EDF, and Sun King-Soleva, are actively working to promote universal access to electricity by developing innovative technologies and providing solar energy services to communities not connected to the grid.

Experts say greater use of renewable energy via solar photovoltaic and hydro power is the best route to universal access to electricity in Togo.

Located in central Togo, this 50 megawatt facility will provide power to more than 158,000 households and save more than one million tonnes of CO<sub>2</sub> emissions. The plant was built by AMEA Togo.

The solar power plant is located in Blitta, a division in the Central Region. With a capacity of 50 MWp, the Mohamed Bin Zayed plant becomes the largest utility-scale solar park in Togo, and indeed in the West African sub-region. The new facility, which supplies clean energy to Togo's national grid, increases the country's energy autonomy.
