CLIMATE CANE IN ASIA-PACIFIC 5. The Solar Nation of Tokelau

It was the birth of Tokelau's ambitious 'Renewable Energy Project', which would see Tokelau become the first nation on earth to be almost 100 percent powered by solar energy and reduce its carbon footprint to almost zero. The machinery behind the project is three solar power plants--one on each island-- with a combined output of 1 Megawatt.

Tokelau islands reach 100% solar power goal , Solar Power

...

(SeeNews) - Nov 7, 2012 - The atolls of Tokelau in the South Pacific became the first territory in the world to meet almost all of its power demand with solar power via a NZD-8.5-million (USD 7m/EUR 5.5m) solar project, New Zealand's government said Monday.

World's First Truly Renewable Energy Nation: Tokelau

Tokelau, a small group of Pacific atolls off the coast of New Zealand, is well on its way to becoming the world's first truly renewable nation. Housing 1,400 people, the island is currently dependent on diesel fuel generators, burning 200 litres of gas daily. However, the residents hope to shed this wasteful habit by October of this year using solar energy.

Beyond Tokelau's 100% solar: add wind power!

Tokelau was the first nation in the world to go 100% solar in 2012. Now the country is aiming to keep its fully renewable energy status in the

future using wind power. This is going to reduce the need for diesel fuel backup in prolonged times of cloudy weather, and when the solar cell system needs maintenance.

Tokelau becomes the world's first 100% solar powered country

Tokelau is one of the world's most remote countries - and the first to be powered fully by PV. SMA Solar Technology AG (SMA) delivered 93 Sunny Island inverters to control the standalone systems on the three coral islands and 205 Sunny Boy inverters to convert the direct current produced by the photovoltaic panels into the alternating current necessary ...

An Island (Tokelau) Powered 100% By Solar Energy

The 4,032 solar panels (with a capacity of around one megawatt), 392 inverters, and 1,344 batteries provide 150 percent of their current electricity demand, allowing the Tokelauans to eventually
