Low-Carbon Electricity: Becoming a World Leader

Electricity is a fast-growing market in which TotalEnergies is developing profitably. The Company's objective is to produce more than 100 TWh/year by 2030, which would place it among the world's top five producers of renewable electricity (wind and solar). TotalEnergies creates value through integration along the electricity chain.

Renforcer notre présence dans les énergies renouvelables

Dans les prochaines années, la demande d'électricité augmentera plus vite que la demande mondiale en énergie. Selon le scénario Développement durable de l'AIE, les renouvelables représenteront plus de 35 % du

mix énergétique en 2040 dans les prochaines années.

Singapore: Pursuing our Solarization Project in Asia

TotalEnergies has been active on the Asian rooftop solar market for commercial and industrial customers since 2018. In 2020, it completed the solarization of French transport & logistics group, Bolloré Logistics' Green Hub in Singapore, helping to significantly reduce the warehouse's CO₂ consumption and environmental footprint.. A solar project for cleaner energy

Renewables

The energy transition is partly based on the electrification of energy uses, which requires a massive increase in the supply of green electrons. Our investments in renewables and electricity accounted for 25% of total investments, which is more than the 20% we forecast a year ago. Combined with our investments in new molecules, this means

TotalEnergies construirá cinco parques solares en Guillena (Sevilla)

Mancebo Ferreiro, director general de TotalEnergies Renewables España. Se

construirán, concretamente, 5 plantas fotovoltaicas: Postigo (51 MW), Arbotante (52 MW), Pilastra (52 MW), La Noria (53 MW) y La Carrasosa (55 MW). En total, las instalaciones contarán con cerca de 400.000 módulos fotovoltaicos bifaciales de 665Wp.
