Turkmenistan - Asia Wind Energy Association

Turkmenistan's energy market is controlled by the State. Primary energy shares (in 2008) consisted of 72.4% gas and 27.6% oil. Most of the population receives natural gas and electricity for free. Those who do pay, enjoy the world's lowest energy prices. Yet, inefficiency and waste are clearly a result of this policy.

Energy in Turkmenistan

Turkmenistan had a total primary energy supply of 26.75 Mtoe in 2014. [1] Electricity consumption was 14.64 TWh. Most of this primary energy came from fossil fuels. [1] All of the electricity is generated with natural gas.
