## Explainer: COP29 host Azerbaijan's developing energy industry

Sadikhov is optimistic about Azerbaijan's energy progress. "The Caucasus has recently become important for global logistics and trade routes due to the situations in Russia and Iran. We have signed a 10GW pipeline with Azerbaijan, which we plan to implement by 2040, that will provide opportunity for domestic consumption and enable green

## The EU and Azerbaijan as energy partners: short-term benefits

Expanding energy ties. Azerbaijan (population

10.3 million), which is the host of this year's global climate summit COP29, is the epitome of a country experiencing carbon lock-in. Oil and gas production contributes roughly half of the South Caucasus republic's GDP and half of all its national budget revenues, as well as more than 90 percent of its export earnings.

## Twig

But how can we store energy until that time? Key facts. Potential energy is stored energy that can be transferred into a useful form. Chemical, elastic and gravitational are all forms of potential energy. The ability to store energy is vital for life and is used by plants and animals. Batteries and

dams use potential energy for power.
