Overview

What is the uspvdb?

In 2020, LBNL and USGS began collaborating on development of the USPVDB to create an accurate, comprehensive, and publicly accessible national large-scale PV database of large-scale PV facilities that includes estimates of the total footprint (i.e., facility size based on array boundaries) of each facility.

How many facilities are in the uspvdb?

The latest release includes data on 4,185 facilities covering 47 states (plus the District of Columbia). The most recent facilities added to the USPVDB became operational as recently as the third quarter of 2023. The oldest facilities in the data set were installed prior to 1990.

How are PV facility records collected?

The PV facility records are collected from the U.S. Energy Information Administration (EIA), position-verified and digitized from aerial imagery, and checked for quality. EIA facility data are supplemented with additional attributes obtained from public sources.

Mon avis après 4 ans de CS:GO et de pvpro : oubliez les sites comme pvpro ou tous les sites de gambling, trading ou même les sites de jeu pour des rémunérations. Au final, seulement faceit semble être legit. Courage aux autres qui ont perdu de l'argent comme ca aussi. Date de l'expérience: 25 mai 2020
