## Overview

---

As the owner of the BESS, Marubeni will provide a service to reduce electricity costs by charging and discharging the batteries, taking advantage of time-of-use electricity rate differentials. This business model, which uses third-party investment in the BESS of this scale to reduce electricity costs, is one of the first of its kind in Vietnam.

As the owner of the BESS, Marubeni will provide a service to reduce electricity costs by charging and discharging the batteries, taking advantage of time-of-use electricity rate differentials. This business model, which uses third-party investment in the BESS of this scale to reduce electricity costs, is one of the first of its kind in Vietnam.

Japan's Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has begun operating a battery energy storage system (BESS) project in Vietnam. The lithium-ion battery is located in Vietnam's central coastal province of Khanh Hoa and has an output rate of 1.8 MW and a capacity of 3.7 MWh, Marubeni said .

BESS emerges as a critical enabler in Vietnam's transition towards a future of energy efficiency, security, and sustainability. By storing surplus energy during low-demand hours and utilising it in times of high demand, BESS eliminates power shortages and blackouts, thus enhancing the reliability of the grid and reducing electricity costs.

Marubeni will begin its side of the cooperative work with a feasibility study of battery energy storage system (BESS) installations which could be installed at commercial and industrial (C&I) locations of VinGroup, VinES' parent company - and Vietnam's largest conglomerate.

The BESS can potentially be integrated with renewable energy systems to accelerate Vingroup's transition to clean energy. In addition, as the only BESS manufacturer in Viet Nam, VinES offers a safe, efficient and economical one-stop solution based on its giga-scale production capacity. What is Bess & why is it important in Vietnam?

BESS emerges as a critical enabler in Vietnam 's transition towards a future of energy efficiency, security, and sustainability. By storing surplus energy during low-demand hours and utilising it in times of high demand, BESS eliminates power shortages and blackouts, thus enhancing the reliability of the grid and reducing electricity costs.

Can Bess be integrated into Vietnam's power grid?

In an effort to facilitate the integration of BESS into Vietnam's power grid, the Electricity and Renewable Energy Authority (EREA) of the Ministry of Industry and Trade recently hosted a technical workshop in collaboration with GEAPP.

What is the Bess project?

The pilot BESS project aims to create an ecosystem that supports the development of robust infrastructure, the introduction of policy reforms, and collaboration important for a smooth transition to clean energy sources.

What is Bess & how does it work?

By storing surplus energy during low-demand hours and utilising it in times of high demand, BESS eliminates power shortages and blackouts, thus enhancing the reliability of the grid and reducing electricity costs. Improved grid stability also implies a reduction in the variability of renewables, facilitating their integration into the grid.

What is a Bess pilot project?

The pilot BESS project would bring forth valuable insights and data on BESS operation for various grid services, critical to reforming the regulatory framework, developing competent technical standards, and designing innovative investment mechanisms to eliminate the current roadblocks in BESS uptake.

Did EVN approve a 50 MW pilot Bess?

The development of a 50 MW pilot BESS by EVN was approved by the Prime Minister under Decision no 1009/QD-TTg on the 'Scheme for the Implementation of the Political Declaration on Establishing the Just Energy Transition Partnership'.

### APPLYING BATTERY ENERGY STORAGE SYSTEM (BESS) FOR

...

In Vietnam for recent years, the development of Renewable Energy (RE) has been strongly promoted, especially in the Southern and Southern Central areas. In. To solve this problem, the application of BESS has been considered to solve the issue of economics and system stability. This is also evident in the Prime Minister's orientation: to

### Marubeni Signs a Memorandum of Understanding with VinFast to

...

In May 2023, Marubeni Green Power Vietnam Co., Ltd, a wholly owned subsidiary of Marubeni Corporation, entered into an agreement with VinES Energy Solutions Joint Stock Company (hereinafter, "VinES"), a EV battery and BESS manufacturer of Vingroup. This MOU will mark the expansion of its collaboration to the field of building a circular

Battery Cluster

### Vietnam Business Directory , Business Listing Site in Vietnam

B2BMAP offers free business listing service for manufacturers, suppliers, wholesalers, and exporters in Vietnam. Our Vietnam company directory helps increase your online presence, boost brand awareness, and connect with

potential buyers. Vietnam online directory includes contact details and addresses, making it easier for buyers to find you.

## Pioneering Innovation with Vietnam's BESS Pilot Project

BESS emerges as a critical enabler in Vietnam's transition towards a future of energy efficiency, security, and sustainability. By storing surplus energy during low-demand ...

## Changing BESS landscape in India

Indian-made batteries offer reliable supply timelines for BESS projects critical to India's energy transition. Improved After-Sales Support and Maintenance: Indian manufacturers can offer better after-sales service and maintenance support due to proximity, reducing downtime and increasing reliability for BESS installations.

## VinES, Marubeni promote adoption of battery energy storage system

This innovative cooperation between VinES and Marubeni, involving the manufacturer/solution provider and the investor/operator will set an exemplar for Vietnam corporations to adopt BESS application in their operations and businesses, and to promote a commitment to

clean energy transition and a sustainable future, according to the companies.

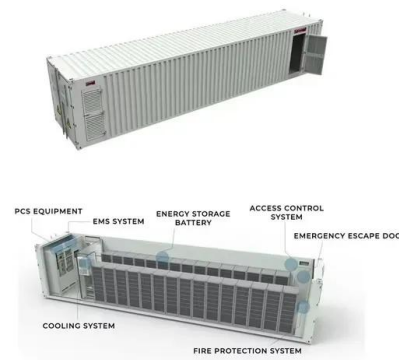

## Vietnamese, Japanese firms sign strategic partnership ...

VinES, a member of Vietnamese conglomerate Vingroup, and Marubeni Green Power Vietnam, a fully-owned subsidiary of Japan's Marubeni Corporation, have signed a strategic partnership deal to promote the adoption ...

## Vingroup, Marubeni launches 3.7 MWh battery energy ...

18 ????. Japan's Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has begun operating a battery energy storage system (BESS) project in Vietnam. The lithium-ion battery is located in ...

## [Shire Oak Vietnam BESS Presentation](#)

Vietnam's installed power production capacity is over 56,000 MW. The overall installed power source capacity of the Vietnamese electrical system is around 69GW according to an Institute ...

## Vietnam powers ahead towards clean energy and green growth

Vietnam has been producing BESS systems and

exporting to international markets. Companies such as VinES and Fluence are already producing and assembling BESS and recently two Chinese companies have approached the government to potentially invest up to \$900 million to build a BESS production facility in Vietnam. BESS initiatives in other countries

## Top 10 energy storage manufacturers in the world

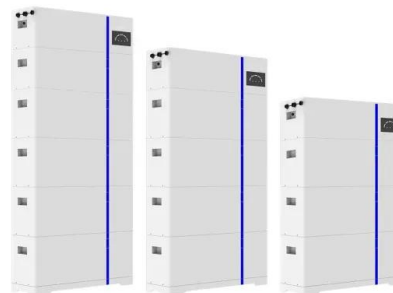

Consult the top BESS manufacturer - Huntkey Huntkey, headquartered in Shenzhen, China, is a major player in the energy storage industry with extensive operations across multiple regions, including Taiwan, the United States, ...
