Vietnam power solutions international

Overview

How will Vietnam's power consumption impact its energy security?

According to Institute of Energy of Vietnam (IEV), Vietnam is set to face a surge in power demand and consumption over the coming decade, which will have an impact on its energy security. The Government of Vietnam expects power consumption to grow 10-12 % annually through 2030, one of the fastest power consumption growth rates in Asia.

Does Vietnam have a nuclear power program?

Nuclear Power: In November of 2016, the Vietnamese government postponed its nuclear power program. Currently, Vietnam encourages nuclear research within the framework of PDP8. The government strictly regulates the retail price, based on a recommendation from MOIT and approval by the Prime Minister.

Will natural gas be a key source of power in Vietnam?

Natural gas will also remain a key source of power generation for Vietnam at seven GW in 2020 increasing to 13.5 GW in 2025 and 28-33 GW in 2030, bringing it from 15% in 2020 to 21-23% in 2030 with a more substantial growth as more LNG terminals enter operation.

How will Vietnam's wind energy policy affect the wind energy sector?

The Vietnamese government has proposed several policies in recent months to boost the development of the wind energy sector. The current FITs for offshore wind are highly attractive at 9.8 US cent/kWh, which were increased from the previous rate of 7.8 US cent/kWh.

Is there a legal framework for offshore wind power in Vietnam?

There is no clear legal framework in Vietnam instructing how to carry out on offshore wind power currently. Vietnam's installed solar capacity of rooftop solar and solar farm has doubled in recent years, rising to an estimated

17,600 MW in 2021, owing mainly to a massive build of more than 11,000 MW in 2020.
