

European Solar Energy Storage

Vietnam wiltech solar

Overview

How has Vietnam benefited from solar & wind power development?

Vietnam has orchestrated the first stage of its solar and wind power development using FITs and a supportive overall investment environment. Government incentives and enabling policies that have boosted energy availability while avoiding upward pressure on electricity prices have gained public support.

What are the characteristics of Vietnam's solar and wind power development?

Eight important characteristics of Vietnam's solar and wind power development are strong political and social support, high FITs, gross metering, land lease exemptions, an absence of reverse auctions, an enabling investment environment, fossil fuel subsidy reform, and regulations on solar and wind equipment recycling.

Will Vietnam's rooftop solar sector get a major investment boost?

The Vietnam rooftop solar sector is set for a major investment boost with a new draft decree published in early October 2024.

Why is Vietnam a good place to invest in solar and wind power?

Vietnam has led the uptake of solar and wind power capacity in ASEAN since 2019. Government commitment and public support are found to be key drivers. Feed-in tariffs can strongly incentivize industry take-off. Policy certainty and preparation of transmission systems are important.

Can Vietnam adopt solar and wind power for other countries?

Semi-structured interviews were conducted with 20 experts from government agencies, academia, private sector, and civil society in Vietnam to inform the analysis. To our knowledge, this is the first paper to investigate policy lessons from Vietnam's initial success in adopting solar and wind power for other countries in the ASEAN region.

How has solar policy been implemented in Vietnam?

According to our expert interviewees, significant effort has gone into facilitating solar policy implementation in Vietnam. Prime Ministerial decisions relating to the sector were made and subsequently detailed in MOIT circulars and EVN technical guidance documents.
