

## European Solar Energy Storage

# Voltero smart powering DR Congo

## Overview

---

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

Can a voltero S420 solar panel charge a generator?

It comes with 4 fixed stands that provide direct sunlight to the panel to maximize panel usage. Voltero S420 solar panel can also be used to charge any other solar generator. The main thing is that the generator has an MC4 connection and an acceptable voltage of 42V. Voltero S420 solar panel can also be used to charge our S25 and S50 power banks.

What is the voltage of voltero s370?

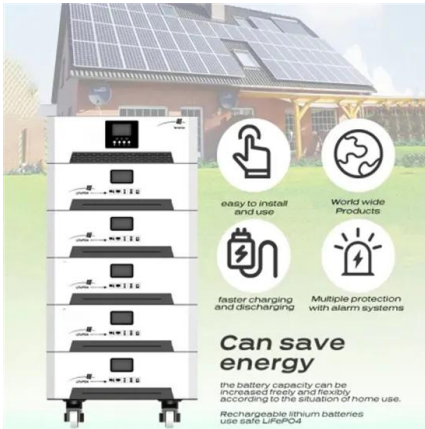

Voltero S370 has a voltage of 42V. It is suitable to charge almost all solar generators available in the market now - SunPower 161 cells with 24% efficiency. Parallel connection of solar cells has less influence on the efficiency.

Will a \$100 million solar project power Gemena & Bumba & Isiro?

An international consortium led by Powergrids plans to invest \$100 million in three off-grid solar plants intended to power the cities of Gemena, Bumba, and Isiro, which are located in the country's northern region and currently have no

connection to the country's power network.
