After accounting.

The PWRcell ensures your home remains powered 24/7, providing a dependable battery backup that keeps your lights on even during extended power outages, making it a critical component for energy resilience. Designed to work hand-in-hand with your rooftop solar installation, the PWRcell stores excess.

A smart electrical panel intelligently manages the power your home consumes, the solar production and most importantly the function of a battery storage system. How many batteries do I need?

How many loads can I back up with 1, 2 or 3 batteries?

Do I need solar to get a battery?

Can I go off-grid?

.

Through the Inflation Reduction Act, homeowners and businesses that install

battery backups can receive a tax credit of 30% off the final contract price. Plus, if you pair your battery backup system with solar your battery costs will also be sales tax exempt per Washington law. We are installing.
