Atlas of the Holocene Netherlands

The landscape of the Netherlands has been changing constantly since the end of the last ice age, some 11,700 years ago. Where we walk today was once a polar desert, a river delta or a shallow sea. The end of the last ice age marked the beginning of a new geological period - the Holocene, the relatively warm geological epoch in which we are still living today. The Atlas of the ...

The Netherlands , Dutch Marine Energy Centre

On the road to a carbon-neutral energy system in 2035, ambitious targets are set by the Dutch government for both energy production (3GW offshore solar and 21GW of offshore wind by 2030) as well as energy carriers such as hydrogen (4GW by 2030). Perhaps even more ambitious are the underlying policy frameworks.
