DISTRIBUTED PV GENERATION + ESS

Overview

Where is Wellington South Battery energy storage system being developed?

Wellington South Battery Energy Storage System is being developed in NSW, Australia. (Credit: Sungrow EMEA on Unsplash) The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW.

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

How will the Wellington Bess project be developed?

The Wellington BESS project will be developed in two stages. The first stage will have a capacity of 300 MW / 600 MWh, while an additional 100 MW / 400 MWh capacity to be added in the second phase.

How will Bess be connected to TransGrid Wellington substation?

The BESS will be connected to the nearby Wellington Substation via an underground or aboveground transmission line. The TransGrid Wellington Substation will be upgraded with a southern bay extension to include an additional 330kV switch bay. The security fencing will be relocated for the development.

What's new at TransGrid Wellington?

The TransGrid Wellington Substation will be upgraded with a southern bay extension to include an additional 330kV switch bay. The security fencing will be relocated for the development. Other ancillary infrastructure will include a

new access road, a washdown bay for incoming vehicles, and a control and office building.
