What are the advantages and disadvantages of solar energy?

The five main advantages of solar energy are: Let's dive to the biggest advantage for most homeowners: energy savings. As we mentioned above, solar panels are no longer a luxury item – they're a reliable long-term investment and a hedge against rising energy costs.

Why should you use solar energy?

Using solar energy also helps save water. Solar panel maintenance requires very little water while nuclear power plants need a lot for maintenance which leads to wasting water. Your electricity bill will be lower because you will get most of your energy from the solar panels.

Why should you install a solar energy system?

Solar panels draw their energy from the renewable resource that is our sun. Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime.

Why should you buy a solar system?

The primary advantage of solar energy is that it freezes your energy costs at a low rate for 25+ years, effectively shielding you from energy price increases. Here's how buying a solar system compares to paying for grid electricity looks for the average American household:.

Can a solar battery system save you money?

These battery systems can also turn solar systems into emergency backups during power outages. With energy storage, homeowners can avoid purchasing electricity during high time-of-use rate periods and benefit from energy arbitrage with net metering, maximizing savings. — Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member
