What are the benefits of the solar energy

Overview

What are the benefits of solar energy?

Each kilowatt-hour (kWh) of solar that is generated will substantially reduce greenhouse gas emissions like CO₂, as well as other dangerous pollutants such as sulfur oxides, nitrogen oxides and particulate matter. Solar also reduces water consumption and withdrawal.

Why is solar power important?

Solar power can help the consumer keep bills low and with net metering, many consumers can even sell extra energy back to the utility company to turn rising electricity prices to their advantage. Technology has improved tremendously since the early days of solar power and advancements continue to be made every day.

Why should you install a solar energy system?

Solar panels draw their energy from the renewable resource that is our sun. Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime.

What are the pros and cons of solar energy?

The pros of solar energy considerably outweigh the cons. It may take several years, but purchasing and installing a solar system can eventually result in major savings on electricity for the consumer in addition to benefits for our environment. The sun is a powerful force, one of Earth's most reliable and plentiful energy sources.

Can a solar battery system save you money?

These battery systems can also turn solar systems into emergency backups during power outages. With energy storage, homeowners can avoid purchasing electricity during high time-of-use rate periods and benefit from

energy arbitrage with net metering, maximizing savings. — Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member.

Is solar a good source of energy?

Solar is the most abundant, fastest, and cheapest energy source on Earth, and it generates minimal greenhouse gas emissions. Although this renewable energy is rapidly growing across the globe, with an increasing number of countries investing in it, there are some factors that could hinder its growth.
