

European Solar Energy Storage

What are the energy storage etfs

Overview

"Vanguard has a popular offering in VDE that provides low-cost, high-yield, diversified exposure to companies involved in the exploration and production of energy products including oil, natural gas and coal," Congdon says. This ETF has been around since September 2004, and has attracted over \$8.6 billion in assets under.

" Generally, in energy we prefer ETFs that are market-capitalization-weighted versus equal weighted," Grossman says. "We prefer this because we.

Some investors may not like the fact that both VDE and XLE are highly concentrated in just two energy giants, Exxon Mobil and Chevron.

Aside from targeting companies involved in exploration and production, investors can also focus on other parts of the energy supply chain. This includes companies that provide the necessary heavy equipment, personnel and financing to the energy sector. For.

"U.S. oil production is currently trending toward record highs," Kalivas says. "The Department of Energy's Short-Term Energy Outlook forecasted production to average 12.8 million.
