# What are the main problems with using solar energy

## Overview

---

Solar energy is far from being reliable compared to other energy sources like nuclear, fossil fuels, natural gas, etc. Since solar energy depends on sunlight, it can only produce energy in the daytime. Solar panels can't produce energy at night so some systems can store energy ultimately making the system more.

One of the factors that make solar energy more interesting is the environmentally friendly benefits it brought with it. The real question is beyond theory.

In comparison with other energy sources, solar energy utilizes a very large area for set up. Usually, rooftops are considered for solar panels the structure or shape of the house can be an issue for installation. The world's largest solar farm in Morocco which produces 580 MW.

The efficiency of a solar panel is usually measured by how much solar energy a panel converts to usable power. To get an idea of how efficient solar.

The huge installation cost of solar energy systems has been a major discussion for a long time now. Energy storage cost is making the already.
