Overview

What equipment do I need to go solar?

You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), especially if you live in an area that doesn't have net metering.

Do you need a solar battery?

Solar batteries can be added to your solar system to store solar energy for later or if you want to use it overnight. Storage batteries also allow a PV system to operate when the electric grid is not available. If you want your solar panels to operate during a power outage, you need to pair them with a solar battery.

How do I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Historically, many solar shoppers only received one solar quote from a door-to-door salesperson or a cold call. But how can you feel confident in your solar decision if you only see one quote?

.

What is the best way to install solar?

The best way to install solar is through a qualified professional who holds a certification to do so and works with high-quality solar panels. The industry-standard certification is awarded through the North American Board of Certified Energy Practitioners (NABCEP). How can I avoid getting scammed while going solar?

.

Can you install solar panels yourself?

You can install solar panels yourself if you're looking to save money on installation costs. Many people who decide to go the DIY route use solar panel kits that cost anywhere from \$7,000 to \$15,000 to cover all of their energy usage.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine if your roof is suitable for solar panels. Start by researching qualified, insured installers online or ask for recommendations from people who have gone solar. Comparison-shop by asking multiple installers to come assess your roof.

What do i need for solar energy
