We find the best and cheapest qualified installer in your area, while offering the best solar warranty on the market and the best deals with the highest quality. Switch to GREEN ENERGY with the best warranty on the market.

Is solar power a viable option in Norway?

Norwegian hydropower is currently so cheap that power companies do not consider it attractive to build solar power plants in Norway. In recent years, however, companies have started selling or leasing solar systems to private customers and businesses in Norway. Despite the low energy prices, solar power is growing rapidly in Norway.

Can you collect solar energy in Norway?

For example, the collection of solar energy was once regarded as gratuitous – especially in parts of the country that had a surplus of energy. Most homes in Norway are now equipped with smart meters allowing you to harvest solar energy, store it, and even sell it back to energy companies.

How can I design my own Solar System?

Look up the address for the installation and design your own solar system in our online drawing program. Receive a quote and order the solar system you have designed yourself, from a local company. We have a dealer network throughout Norway that installs solar systems where you live.

How do I install a solar system?

Select the desired building on which you want to have a solar system installed. Get a proposal for a suitable solar cell system based on the building's dimensions. Choose the roof type and draw in pipes, ventilation,

snow traps and other obstacles on your roof. See your solar system in 3D.
