The South Korea Reference Case Report covers our half-yearly updated analysis of the power market in South.

Rates for electricity sold wholesale to Korea Electric Power Corporation (Kepeco) will be capped by the government in an effort to support the struggling utility. The new measure will limit the system marginal price (SMP), or wholesale price, of electricity generated by private power suppliers, and.

The wholesale power price in South Korea hit an all-time high on the first day of this month due to a surge in international gas price from Russia's energy weaponization, tabling the option of increasing coal fuel in place of natural gas for power generation to ensure stability in colder weather.

The system marginal price (SMP) for electricity in South Korea stood at around Log in or register to access precise data. South Korean won per kilowatt-hour as of March 2025. The South Korean government introduced the SMP ceiling system at the end of 2022, which limits the wholesale price at which.

South Korea is a large energy-intensive electricity market characterised by large baseload demand served almost exclusively by coal, natural gas and nuclear plants. Local and international developments prompted the government to change its views on the electricity market. Concerns on declining air.
