Why did nevada shudder its solar energy rooftop

Overview

It was the biggest rollback of rooftop solar incentives in the nation. Most notably, Nevada is the first state not to grandfather in people like Matz who've already invested in rooftop.

It was the biggest rollback of rooftop solar incentives in the nation. Most notably, Nevada is the first state not to grandfather in people like Matz who've already invested in rooftop.

Efforts to restore Nevada's stagnant rooftop solar industry are becoming more complicated, with the state's primary utility proposing rate changes that would affect nearly all electric customers and potentially lowering the value of reimbursement rates for rooftop solar customers.

In Nevada, the utility NV Energy is fighting against rooftop solar, specifically opposing the net metering policy that gives rooftop solar users credit for the power their panels produce.

Consumers unequivocally demanded access to rooftop solar, and the legislature responded by passing a bill — nearly unanimously — allowing the state's crushed residential solar industry to .

The debate over Nevada's solar industry is not going away anytime soon, with solar companies and activists continuing their efforts to reverse the PUC's decision to cut back on net-metering rebates. Does Nevada have a solar problem?

The sun is not impressed, Nevada. Nevada is currently embroiled in an enormous controversy over rooftop solar power. With a recent decision, regulators have cut off the state's burgeoning solar industry at the knees, enraging customers and sending solar companies fleeing the state.

Is Nevada the first state not to grandfather in rooftop solar?

Most notably, Nevada is the first state not to grandfather in people like Matz who've already invested in rooftop solar. Although an estimated 17,000

people have installed panels, the revised rules, which will be phased in, will apply to to them as well as new rooftop solar customers.

What's going on with Nevada's Solar monopoly?

Nevada is currently embroiled in an enormous controversy over rooftop solar power. With a recent decision, regulators have cut off the state's burgeoning solar industry at the knees, enraging customers and sending solar companies fleeing the state. For the state's monopoly utility, it's a successful attempt to avoid competition.

Is rooftop solar a bad deal in Nevada?

In fact, the new rules make rooftop solar such a bad deal in Nevada that big solar panel installation companies, including SolarCity, last week announced major layoffs affecting several hundred workers. SolarCity installation. By Tom Hart. CC/Flickr.

Will Nevada's New Net metering program destroy the solar industry?

Nevada's public utility commission has radically revised the state's net metering program, slashing payments to solar homeowners by half and raising fees, a move advocates say will destroy the state's fast-growing (and wildly popular) solar industry. The changes are retroactive, so existing solar homeowners are seeing their payments shrink.

How much will solar cost in Nevada?

By Dale Matz Their good intentions were foiled late last month when the Nevada Public Utility Commission changed the deal that customers with solar panels have with the state's big utility, NV Energy. At the request of NV Energy, monthly fees paid by rooftop solar customers will increase from \$13 to nearly \$40 by 2020.
