# Why go solar energy

## Overview

---

What are the benefits of solar energy?

Let's see what benefits solar energy comes with. 1. Locally-produced energy 2. Reduced electricity bills 3. Tax reductions and incentives 4. Flexible financing 5. Easy installation 6. Added home value 7. Durability & easy maintenance 8. Clean & emission free 9. Conserves natural resources 10. Accessible in remote areas.

Why should you install a solar energy system?

Solar panels draw their energy from the renewable resource that is our sun. Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime.

Why should you go solar?

Solar is increasingly used for backup power. Given how severe storms can be throughout the country, more and more people pair their solar panel systems with batteries to provide power during adverse weather. Going solar boosts your local economy.

Why do we need solar power?

Still, about 60% of the electricity that power plants generate in the U.S. comes from fossil fuels like coal and natural gas, which we know contribute to issues related to global warming and climate change. Going solar helps reduce our reliance on carbon-emitting fossil fuels.

Why should you invest in solar energy?

Millions of Americans are deciding to power their homes with solar energy—especially as costs have decreased—but an investment in solar generates more than just clean energy. It can support household savings, energy independence, economic opportunities, grid resilience and security,

and a safer planet.

What makes modern solar power technology so attractive?

What makes modern solar power technology particularly attractive is that energy can be generated even when it is not perfectly sunny. This is because today's technology relies on a daylight. If you don't live in an area which is as sunny as California, do not be put off from looking into solar power !
