

## European Solar Energy Storage

# Why should i put solar energy

## Overview

---

Why should you install a solar energy system?

Solar panels draw their energy from the renewable resource that is our sun. Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime.

Why is solar energy important?

Solar energy creates free, renewable power from the sun. It's abundant and produces no carbon emissions or local air pollution. Still, about 60% of the electricity that power plants generate in the U.S. comes from fossil fuels like coal and natural gas, which we know contribute to issues related to global warming and climate change.

Why should you invest in solar power?

Economizing electricity bills can be a huge motivator to turn to renewable energy sources such as solar power and install solar panels. Nowadays you can invest in solar much easier, mainly thanks to federal tax credit incentives and financial assistance programs. You can start using these solar power benefits today.

Are solar panels good for the environment?

Solar panels use photovoltaic cells to harness radiation from the sun and convert it into electricity. They're an emissions-free energy source that reduces your carbon footprint. But the environmental benefit is just one of many. Considering Solar Panels?

What are the benefits of solar panels?

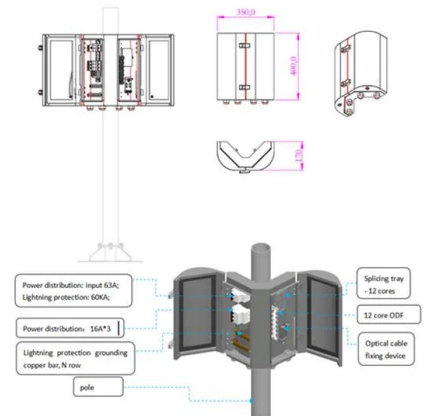

Lower your carbon footprint. Upfront costs. Save on your electric bill. Not

every roof will work. Increase your home value. Potential property tax increase. Federal tax credits. Solar storage expense. Nearly 4 million American households have switched to solar power Here are a few of the benefits of residential solar panels.

Is solar a good investment?

If you aren't planning on moving for many years or have reason to believe the short-term energy savings and the boost to your home's value will recoup your investment, solar could pay off. If you don't have high energy costs or your state makes it harder to go solar, it might not be worth it financially.

## Why should i put solar energy

## Why You Should Use Solar Energy
