Improving nutrition in Timor-Leste

Timor-Leste has one of the highest rates of undernutrition in the world - the highest in Asia and higher than in most African countries. Undernutrition can have devastating effects on children's long-term development. The causes include low incomes, low agricultural productivity, food insecurity, limited access to health services and

Timor-Leste

This reflects the active effort of Timor-Leste's leaders to engage countries in Asia through diplomatic meetings. Timor-Leste also scores relatively higher in the resilience measure, ranking 22nd. Timor-Leste exerts less influence in the region than expected given its available resources, as indicated by the country's negative power gap score.
