What is the energy sector in Zambia?

**ZAMBIA'S ENERGY SECTOR OVERVIEW** Zambia's energy resources include electricity (hydropower), petroleum, coal, biomass and renewable energy. It is only petroleum which is wholly imported in the country. The Energy Sector in Zambia consists of three main sub-sectors namely: Electricity, Renewable Energy and Petroleum. **ELECTRICITY SUB-SECTOR.**

Which sector consumes the most electricity in Zambia?

The mining sector remains the largest consumer of power at 51% of total generated electricity, followed by the domestic sector at 33%. Installed Generation Capacity Zambia's Electricity Sector Market Structure.

How is Zambia's Electricity Market structured?

Zambia's electricity market is structured as a single-buyer market model with ZESCO acting as the unique off-taker and bulk retailer of electricity on the national interconnected system.

Why is energy important in Zambia?

Energy is a prerequisite for the proper functioning of all sectors in the economy in Zambia. With the rising demand in Zambia and the SADC region outpacing generation, it is necessary to extend and upgrade distribution networks to improve the standard of living.

How can Zambia become a major player in the energy sector?

With the right approach, Zambia can become a major player in the energy sector, specifically in the renewable energy industry. This requires assertive lobbying for renewables at national, regional, and sub-regional levels.

What companies trade in electricity in Zambia?

Private companies also trade in electricity in Zambia. The largest of these, Copperbelt Energy Corporation Plc (CEC), buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also operates its own generators, most of which run on fossil fuels.
