Åland which is the best solar

Overview

Maximise annual solar PV output in Mariehamn, Åland Islands, by tilting solar panels 49degrees South. The location at Mariehamn, Åland Islands, is somewhat ideal for generating energy via solar photovoltaic.

Maximise annual solar PV output in Mariehamn, Åland Islands, by tilting solar panels 49degrees South. The location at Mariehamn, Åland Islands, is somewhat ideal for generating energy via solar photovoltaic.

With that idea in mind, the energy company Flexens saw an opportunity to develop and build a society scale energy system based on renewable energy sources on Åland together with the island government - an archipelago situated in the Baltic Sea with ideal wind and solar conditions.

- Åland has been a pioneer in wind power with the first investments over 20 years ago - Roll-out of small scale solar systems - EV's and electrification of public transport.

- Best wind and solar conditions in the region
- Self-governed (own energy market regulation) and own grid area
- Ambitious and rewarded sustainability agenda.

The energy company Flexens has identified the opportunity to develop and build a society scale energy system based on renewable energy sources on Åland together with the island government- an island with ideal wind and solar conditions and an ambitious climate- and energy strategy with a population dedicated to sustainability.

Which electricity retailer offers the best solar feed-in tariff?

Since then, however, solar PV system prices have fallen considerably, meaning that an investment in a solar PV system is still worthwhile, but how to best use a system has changed. When feed-in tariffs were higher than the cost of grid electricity, it made sense for homes & businesses to try to export as much power as possible, as this would
